

**SUBSTITUTED 3-(2,5-DISUBSTITUTED)PYRIDYL-4-ARYL PYRROLES FOR
TREATING INFLAMMATORY DISEASES**

5

Abstract of the Invention

This invention provides novel substituted 3-(2,5-disubstituted)pyridyl-4-aryl pyrroles, and pharmaceutical compositions comprising same, useful for treating disorders ameliorated by reducing TNF- α production and/or p38 activity in appropriate cells. This invention also provides therapeutic and prophylactic methods using the instant pharmaceutical compositions.
